| CONSUME	COLLABORATE	PRODUCE
Monitor multiple twitter streams, hashtags, and @ responses via **tweetdeck**	Evaluate credibility of a website, blog post, or social media comment with **Skitch**	Create "layered" documents that use hypertext to embed supporting sources or media with **Pages**
Explore the relationship between a city's transportation system and population growth using **UpNext 3D Cities and Science Population**	Collaboratively categorize online project resources with **Diigo**	Create a concept map to attempt to explain the relationship between a YouTube video and the suggested videos using **YouTube**
Visualize how certain themes or motifs emerge from certain geographical regions, and infer the cause-effects relationships that may contribute to that with **Google Earth**	Plan necessary project details with **Zenbe Lists**	Collect visual evidence of a problem, issue, or event using **Tumblr**
	Insert comments to support revision of expository writing using **Google Docs**	
View presentations that model non-linear, multimedia-based idea development with **Prezi**	Share voice notes for projects—from planning to to-do lists to project barriers—with **Dragon Dictation**	Demonstrate the spread of a philosophical idea using **Google Maps**
	Collaboratively pin images of a competitor's design when mock planning a startup via **Pinterest**	Create infographics that explore a complex topic in highly-digestible forms using **visual.ly**
Curate multimedia resources for a group project using **YouTube**		Liveblog a personal or academic event via **Storify**
Listen to podcasts to gain context on an issue via **Downcast**	Backwards plan projects and related due-dates using **Google Calendar**	Create photo collage to demonstrate impact of pollution, litter, or even genocide using **Diptic**
Remediate non-mastered	Have students record PBL-based group work and progress daily—and share with	Create quick, weekly podcasts

There is a lot out there...

The idea is not to do the same old thing...

Thank you!
